Capabilities Statement

Compunetics, Inc., in business since 1968, is a leading manufacturer of printed circuit boards and assemblies for the defense, aerospace, communication, high-speed computing, medical and semiconductor markets for rigid, flexible, and rigid-flex printed circuit boards. In working with our parent company, we can also provide full turnkey assemblies to our customers.

Compunetics provides time critical, high mix to low volume printed circuit boards with quick turns from 5 to 15 days depending on technology to standard turn times of 4 to 6 weeks. Previous successful projects include:

- Supplier to DoE, DoD, and Government Agencies for 50+ years
- Production supplier for most Prime Defense Contractors
- Space flight approved for several programs

ITAR registered, NIST DFARS 252.204-7012 Compliant, and all products are manufactured in the United States.

Business Size: Certified Small

NAICS Codes: 334412 and 334418

DUNS #: 045301348

Rigid/Flex PCB Manufacturing and Assembly

Bare Board Manufacturing

- Flex/Rigid PCB Manufacturing
- Bonded and Loose-Leaf Construction
- Military & Commercial Applications
- Large format boards up to 34" x 22"
- RF / Microwave Products
- Heat Sink Boards
- High Speed Materials – Mixed Materials
- Embedded Passives
- High Technology / High Reliability
- Tatsuta Shield Material
- Backplanes

Assembly

- Surface Mount, Through Hole, Mixed
- Turnkey & Consignment
- ICT, FPT, functional & envir. testing
- BGA placement & rework, 100% AOI & Xray
- Lot/date code component traceability
- Box build assembly & testing
- Supply Chain Management
- Conformal Coating
- Counterfeit Mitigation Program
- Real-time MRP System
- Dedicated Project Management for each customer
